

Dear Governor Riley,

My children are showing an interest and aptitude for math and science. However, the state program for math and science is not available in my part of the state. I would like my children to have the trained teachers and the resources that are available in the Alabama Math, Science and Technology Initiative for their school. I voted for you and supported your tax package. I would like you to do what you can to get AMST here locally in our Elmore Co. schools.

Concerned Parent,
